

TIFFANY PEAVY

863.934.9567 | tiffanywhitsett@usf.edu | Lakeland, FL

EDUCATION

University of South Florida

Bachelor of Science in Cybersecurity

Overall GPA: 3.46

Tampa, Florida

December 2025

Polk State College

Associates of Arts

WORK EXPERIENCE

Cyber Security Solutions (CSS) | Cybersecurity Intern

Tampa, Florida

May 2026 - Present

- Provide first-line support for clients by managing, prioritizing, and resolving technical requests through the **Autotask** ticketing system.
- Troubleshoot and **resolve hardware, software, and connectivity issues**, including VPN configurations and endpoint repairs.
- Harden client systems and mobile endpoints through real-time network monitoring utilizing **Kaseya** and **IBM MaaS360 UEM**.

UNIVERSITY AND VOLUNTERING PROJECTS

A.I. Bootcamp

Tampa, Florida

August 2025

- Built image classifiers for satellite datasets and explored deep learning architectures like CNNs and Transformers in **Keras**.
- Utilized Principal Component Analysis (**PCA**) for noise filtering and Linear
- Discriminant Analysis (**LDA**) for dimensionality reduction to optimize efficiency.

Database Programming and Administration – SQL Server

Tampa, Florida

January 2025–May 2025

- Developed **T-SQL scripts** and stored procedures for processing data.
- Programmed **DML triggers**, enforcing rules and maintaining referential integrity.
- Managed security by configuring login IDs, users, and user-defined roles.

Cybersecurity Biometrics Project

Tampa, Florida

January 2024–May 2024

- Trained **MLMs for biometric identification** and image recognition using Python and **Matplotlib**, applying feature extraction techniques.
- Developed scripts to visualize authentication error and system reliability through Receiver Operating Characteristic (**ROC**) and Detection Error Tradeoff (**DET**) curves.
- Implemented **multi-modal fusion** using majority vote to enhance recognition accuracy.

OPNsense Configuration Project

Tampa, Florida

January 2024 –January 2025

- Configured and deployed **OPNsense firewall system** to simulate enterprise-grade network protection protocols.
- Implemented web, FTP, telnet proxies, and traffic shaping for bandwidth monitoring.
- Completed an **OPNsense-to-SIEM integration** for centralized log collection and anomaly detection.

TECHNICAL SKILLS

SentinelOne, **Kaseya**, Azure, Autotask, IBM MaaS360, **SIEM**, **SSMS**, **SQL**, Keras, LLM, Scikit-learn, TensorFlow, NumPy, Matplotlib, **Splunk**, PowerShell, **Python**, C, C#, JavaScript, CSS, RUST, Applied Cryptography, HTML, Snort, OPNsense

ASSOCIATIONS, HONORS & AWARDS

- STEM Professional Development and Resilience Scholarship

August 2022–December 2025

- Whitehatters Club, Girls Who Code

January 2023–December 2025
